PROJECTS

Employee Attendance System

- It is a LAN application system
- It is basically used for tracking the record of employee in an organization
- It makes monthly report of the employee attendance and their work

Restaurant Management System

- It is a desktop application system used in Restaurant.
- It keeps track of each money and food transaction in and out of the restaurant
- It have admin and non-admin user where admin user have full authority and non-admin user can only record food item taken by customers
- It create a monthly report on the basis of the transaction of that month
- Also have billing printing system for the customer

Gold Inventory Management Sytem

- This project is solely interested in developing a software system that keeps gold record in any jewelry shops
- The software enables jewelry shops to keep records of raw gold purchase, ornament order/manufacture and keeps tracks of all the ornaments that the shop currently has
- The idea behind the software is to minimize the effort involved in keeping track of the ornaments available in stock, ornaments sales etc
