  - Java

## PROJECT

---

### **Gallery Application**

This application is developed using object-oriented PHP and MySQL as the database. Here, public users can view photos and write comments while, admin users can add or remove photos and comments. The system keeps log about the user login and when new photo is added. It also features pagination and PHPMailer which email the admin when new comment has been added.

### **Inventory Management System**

This system is a group project developed using procedural PHP and MySQL as a database. The user could log into the system and perform several CRUD operations. This project made use of several available third-party tools.
