About me

My aim is to create better interfaces and experiences for the user, making the web, applications and technology easier for the user. Simplifying communication barriers by bridging the gap between end-users, designers and developers.

I am able to work effectively in a team. I have demonstrated an ability to lead small Teams and mentor other workers. I pride myself on being able to use my knowledge and initiative to deliver high quality results to tight deadlines. I enjoy a challenge and look for the opportunity to expand and develop my skill set.

Projects

Scoreh

July 2018 – Present

Description

It is an easy to use web application to create, design, assign and analyze online assessments. Creating a test is just a click of button away. When you click on create test, system will create a predefined test based on standard test settings. But If you need to customize then everything is simple and is effective right away.

When you finish adding all questions to your test, you can start inviting candidates right away. You can either make your exam public or private. If the exam is public then users can access it right away but if it's private then the system will just email your candidates from the system.

My responsibility

- Involved in designing the overall UI of the whole platform.
- Created the wireframe for the whole platform.
- Designed the overall branding of the whole website including the logo, color themes and other required design assets.

Technology stacks

- Adobe Illustrator
- Adobe Photoshop
- Adobe In design
- Balsamiq

Icon Packs

Dec 2016 – Jan 2018

Description

In the course of nearly one and half year I was involved in designing various icons packs for android. The combined total downloads of those entire icon packs is nearly one million in google play store.

Most of the icon packs we've designed are Paid and some of them are for free. I was also involved in designing the compatible wallpapers for each icon packs. Most of the wallpapers I've designed were based on the minimalist design approach.

My responsibility

- Come up with a concept for a particular pack.
- Designed the texture, backgrounds and other design assets for each icon.
- Designing the minimal wallpapers for each app included in our icon packs.

Technology stacks

- Adobe Illustrator
- Adobe Photoshop
