Work Experience

AMNepal, Kathmandu, Nepal

Role: Senior Web Developer (June 2016-Present)

In this role, I am responsible for working with designer and customizing themes. We directly have meetings with Office Team (both Nepal and Australian through skype) and work according to the requirements of clients. Other duties and responsibilities include:

- Theme customization in WordPress.
- Plugin development for WordPress.

EbPearls Pvt. Ltd., Kupondole, Kathmandu, Nepal

Role: PHP Developer (December 2013 – June 2016)

In this role, I am responsible for working with designers, Front end and project management staff to meet requirements for the functional elements of website projects. Leading specific projects and coordinating with clients & office team to ensure work carried out meets standards, guidelines and clients' expectation are also my prime job responsibilities. Other duties and responsibilities include:

- Building **PHP websites** using PHP based frameworks.

- Develop competitive web applications as per clients' requirement using open source CMS applications such as WordPress & Drupal.
- Develop **plugins in WordPress & Drupal** as per the requirement of clients.
- Coordinate with clients and resolve issues related to **jQuery, Ajax, javascript** and browser compatibility.
- Prepare and maintain database using **mysql**.
- Interpret and evaluate business and client needs to determine risks along with design apt solutions.
- Plan, communicate and monitor tasks progress; evaluate, suggest and resolve technical and process issues.
- Use **NetBeans, Sublime Text and Notepad++** for web development; use **Mantis & Zoho** tools for project management.

Key Projects Handled:

1. Eglise Catholique Romaine–Genève

URL: <http://ecr-ge.ch/>

Technology used: WordPress, jQuery, Ajax

Team: Consisting of 4 members including a Developer, a Designer and a Quality Analyst (QA) and Project Manager.

Features included in this project are as follow:

- In order to reduce the server load, in activity listing page we have implemented Infinite Scroll with Lazy loading so that we could achieve easy UI at the same time reduce server load.
- Also another interesting feature that I have implemented in this site is to generate sub-site dynamically for churches which can be managed through sub-site admin panel.

- Other feature that is included in this site is an Event Filter mechanism where events are filtered on the basis of time (year/month/day) by considering recurring and non-recurring and further recurring as weekly and monthly and non-recurring as daily.
- Also as an email management tool, I have implemented Mail Chimp in this site as well.

2. **Emile Garcin – Properties**

URL: <http://www.emilegarcin.ch/>

Technology used: WordPress, JQuery, WPML plugin

Team: Consisting of 4 members including a Developer, a Designer and a Quality Analyst (QA) and Project Manager.

In this site I have implemented mega menu with the use of walker class. Some other feature in this site in which I have worked are as follows:

- A Multilanguage feature is implemented in this site using WPML plugin.
- Other feature that is included in this site is Multi-layer Filtration of ventes i.e. properties. Properties are filtered on the basis of keyword, property id and city and price.

3. **World Trade Center – Geneva**

URL: <http://www.wtc-geneva.ch/>

Technology used: WordPress, WPML plugin. Google Yoast

Team: Consisting of 4 members including a Developer, a Designer and a Quality Analyst (QA) and Project Manager.

Features included in this project are as follow:

- A Multilanguage feature is implemented in this site using WPML plugin.
- For SEO optimization I have used Google Yoast and also site is optimized with the use of W3total cache.

4. **The cook, his wife and her shoes**

URL: <http://cook-wife-shoes.com/>

Technology used: WordPress, woo-commerce, jQuery, Ajax

Team: Consisting of 4 members including a Developer, a Designer and a Quality Analyst (QA) and Project Manager.

Features included in this project are as follows:

- One of the feature I have implemented in this site is retrieving Instagram Feeds using Instagram API on the home page.
- This is in an ecommerce site in which I have added some features including new arrival section.

Skills:

- Proficient in Scripting Languages as JQuery, Ajax; web services as SOAP, REST; programming languages as Object Oriented PHP, C, C++, Java, .NET; markup languages as HTML, XML.
- Team player, hardworking, proactive and confident.
